<i>List of Illustrations</i>	xi
<i>Preface</i>	xv
<i>Acknowledgements</i>	xvii
Introduction	1
1. The Need to Capture Carbon	5
<i>What is Carbon Capture?</i>	5
<i>Climate Change is Real, and a Threat</i>	6
<i>Carbon Fuels are Abundant</i>	16
<i>Carbon Fuels Will Continue to be Used</i>	19
<i>Carbon Capture is Feasible Today</i>	24
<i>Carbon Capture is not only about Fossil Fuel Electricity</i>	26
<i>No Single Solution to Climate Change is Perfect or Sufficient</i>	27
<i>Capture can Tackle Carbon Dioxide Already in the         Atmosphere</i>	41
<i>A Portfolio of Solutions is Required</i>	42
<i>Risks to CCS</i>	44
2. Capture Technology	47
<i>Capture Techniques</i>	47
<i>Power Station Capture</i>	48
<i>Post-Combustion</i>	52
<i>Pre-Combustion</i>	57
<i>Oxyfuel</i>	63
<i>'Second Generation' Techniques</i>	65
<i>Comparison of Capture Options</i>	69
<i>Industrial Capture</i>	73
<i>Environmental Impacts</i>	78

## CONTENTS

<i>Air Capture</i>	80
<i>Decarbonising Transport</i>	83
<i>Conclusion</i>	87
3. <i>Transport and Storage</i>	93
<i>Transport</i>	94
<i>Practical Uses</i>	96
<i>Storage Sites</i>	98
<i>Enhanced Oil Recovery</i>	101
<i>Enhanced Gas Recovery</i>	106
<i>Enhanced CBM</i>	107
<i>Depleted Oil- and Gasfields</i>	109
<i>Saline Aquifers</i>	110
<i>Other Underground Storage Options</i>	115
<i>Underground Coal Gasification</i>	119
<i>Ocean Storage</i>	120
<i>Mineralisation</i>	121
<i>Storage Capacity</i>	125
<i>Probability of Leakage</i>	133
<i>Hazards of Leakage</i>	144
<i>Monitoring and Remediation</i>	148
<i>Conclusion</i>	154
4. <i>Bio-sequestration</i>	155
<i>Biomass</i>	160
<i>Forestation</i>	162
<i>Land-Use and Soils</i>	168
<i>Carbon Sequestration and Biochar</i>	170
<i>Ocean Fertilisation and Other Geo-Engineering</i>	174
5. <i>Scale, Costs and Economics</i>	179
<i>CCS's Role in Emission Reductions</i>	179
<i>Scale of a Global Carbon Capture Industry</i>	184
<i>The Cost of CCS</i>	187
<i>Capture Costs: Principles</i>	190
<i>Capture Costs: Current Systems</i>	193
<i>Capture Costs: Future Systems</i>	196
<i>Capture Costs: Potential for Cost Reductions</i>	199
<i>Transport Costs</i>	201
<i>Storage Costs</i>	202
<i>Total Cost</i>	206

## CONTENTS

<i>Air Capture</i>	209
<i>Capacity and Cost of Biological and Land-Use Sequestration</i>	213
<i>Costs at the Macroeconomic Level</i>	218
<i>Carbon Pricing for Capture to Take Off</i>	218
<i>Competitiveness Against Other Low-Carbon Approaches</i>	221
<i>Long-Term Costs and Scale</i>	224
<i>Conclusion</i>	227
6. Policy	229
<i>Carbon Abatement Policies</i>	230
<i>The Need for Government Action</i>	235
<i>Short Term: Need to Start Soon</i>	238
<i>Near-Term Policies</i>	241
<i>The Commercialisation Phase</i>	245
<i>Longer Term: Paying the Cost of Carbon</i>	249
<i>Bio-sequestration Funding</i>	253
<i>Legal Framework</i>	257
<i>International Perspectives</i>	263
<i>Current Projects</i>	267
<i>Europe</i>	267
<i>USA</i>	271
<i>Canada</i>	273
<i>Asia</i>	274
<i>Australia</i>	275
<i>Latin America</i>	276
<i>Middle East and North Africa</i>	276
<i>Business Opportunities</i>	277
<i>The Human Angle</i>	281
<i>Long Term</i>	289
7. Risks	295
<i>Technical</i>	296
<i>Costs</i>	296
<i>Environment</i>	299
<i>Safety</i>	300
<i>Public Acceptability</i>	300
<i>Institutional</i>	303
<i>Risks to Biological Sequestration</i>	307
<i>Combining the Risks</i>	310
8. Conclusions	313

## CONTENTS

Appendix: Further Details	321
<i>Chapter 1: The Need to Capture Carbon</i>	321
<i>Chapter 2: Capture Technology</i>	323
<i>Chapter 3: Transport and Storage</i>	326
<i>Chapter 5: Scale, Costs and Economics</i>	329
<i>Chapter 6: Policy</i>	341
Notes	343
<i>Bibliography</i>	379
<i>Glossary</i>	417
<i>Index</i>	429
