## The End

In its program the Czech Social Democracy stresses the values of honest work being the only one creating the real wealth of the society. Therefore we want to address workers, technicians, farmers, services employees, doctors, teachers, artists, scientists and entrepreneurs. We do not address swindlers or those who got rich abusing their functions. On the contrary, these people will be in case we win the elections prosecuted. We will not tolerate the possibility that the future of our country might be based on frauds and appropriation, on transferring funds from those social groups that cannot defend themselves effectively - tenants, young families, students, the ill or pensioners.

We are for a society of solidarity whose aim is the prosperity for everybody and where the humanity beats selfishness.
