ENGLISH

The first part of the book is devoted to the study of the English language in its historical development. It traces the roots of the language to the Indo-European family and shows how it has been shaped by contact with other languages and by internal changes. The second part deals with the structure of the English language, including grammar, syntax, and semantics. The third part discusses the English language in its social and cultural context, and the fourth part deals with the English language in its literary and artistic context.
